OUR COMPANY BRAND

Introduction to the Sterling Brand

In response to demonstrated needs within the market, Sterling Products continuously seek to develop new products and ideas intended to assist our clients and support them in their operations.

Sterling Products offer a comprehensive service from project management to site audit, conceptual design, manufacture and fabrication, through to installation and maintenance and even storage facilities.

Utilising our own team of in-house designers, project-managers / coordinators, fabricators, craftspeople and site installation teams with security wiring licenses, Sterling Products are more than capable of successfully delivering on all of our clients' architectural and corporate projects, developments and fit-outs of virtually any size or complexity.

WHO IS STERLING PRODUCTS

Company foundation / History

Since commencing operation some 30 years ago, Sterling Products began as a specialist provider of custom products made from Plastics and Metal. Since its inception, Sterling Products has grown to become an industry leader in the production of ATM Cabinets and financial and banking sector signage. This progression has enabled us to broaden services to now include internal and external building signage and prints, retail and commercial fit-outs, exposition and display signage, new product innovation and development and to provide customers a comprehensive “one stop shop” for projects of this type.

Point of interest...

The origin of the company name of Sterling Products was derived from the company office building in the year 2000. The company registered office at 295 Saint Pauls Tce. in Brisbane was a Brisbane landmark building called “Sterling House” and thus the name was subsequently adopted as the new company name for Sterling Products Pty Ltd as it is known today.

BUSINESS PARTNER

Stretch your imagination with Australia's only EFI thermoformable direct to substrate printer.

At Sterling Products we are able to create custom formed signs, packaging, POP displays, vending panels and other thermoforming applications faster and more efficiently by imaging direct to substrate with our EFI pro series UV digital printer engineered specifically for thermoforming.

With outstanding elongation characteristics, excellent adhesion and consistent post-draw opacity, we can print and form images up to 3m x 1.5m with a depth capability up to 600mm draw.

Key benefits

- ✓ Print Single sided or Double sided panels, in full colour and high resolution.
- ✓ Front lit and back lit prints direct to product without delaminating or releasing as will often occur with an applied vinyl print.
- ✓ Fade resistant print images, filtered from ultra violet rays by the material selected before being printed. Increased longevity and colour vibrancy retention.
- ✓ Scratch and Damage resistance provided by the correct material selection for reverse printed applications.
- ✓ Print panels up to 2000 mm wide and up to 50 mm thick to desired length, dependant on available stock sizes of chosen material.
- ✓ Multiple printed product applications - plastics, metals, timber, glass and ceramic and more with unsurpassed adhesion.

BUSINESS PARTNER

Give your space a whole new look with our new ceiling graphic panels. Any desired design can be produced using our direct to substrate UV printer to turn your plain white ceiling into something special, whether it be individual feature tiles or designs spanning your entire ceiling.

Direct printed light panels can add additional highlights, while also illuminating the room. Panels can be fully or partially printed depending on the desired design and lighting requirements.

Architectural seamless pattern designs can be used to add a new look or recreate an old. From period featured panels to more modern designs, achieve the look your after while keeping costs and roll out time to a minimum.

PRINTED PANEL LIGHTS

Available in a range of standard ceiling tile sizes with a slim, lightweight body making installation a breeze.

MOTIF + SPANNED PANEL DESIGNS

We can create designs to suit your application or turn your artwork in to an amazing ceiling.
